RivePipe

RivePipe MALE

RivePipe FEMALE

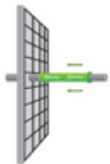

WHAT IS IT?

RivePipe is the first patented, **removable** and **reusable** conotube, specifically designed for concrete formwork and avoids plastics inside the wall.

WHAT DOES IT DO?

It offers a reusable solution that allows creating a clean void in the concrete to facilitate subsequent sealing, without any **wasted plastic**.

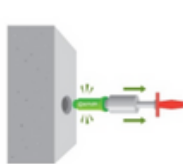

INSTALLATION PROCESS

#1 Insert RivePipe to protect the formwork bar

#2 Pour concrete into the formwork and allow to set

#3 Remove RivePipe from both sides of the wall

#4 Deposit RivePipe in the bucket for later reuse.

Reduce
Reuse
Recycle

ADVANTAGES

REMOVABLE

Easy to remove from the wall without damaging it.

REUSABLE

Environmentally friendly. Reusable several times.

FAST EXTRACTION

Extraction with RiveOut in a few seconds.

RELIABLE AND SAFE

Prevent the risks associated with leaving lost PVC pipes inside concrete structures...

ADAPTABLE

To all wall thicknesses.

RECYCABLE

3R.

RECYCLED

Mostly made from recycled material.

SIMPLE AND CLEAN

The holes are uniform, empty, smooth and clean.
